I am writing to apply for the Softwareentwickler (m/w/d) mit KI-Fokus position at MySpa Service GmbH. Your focus on integrating AI capabilities into existing software systems while maintaining stability in 24/7 production environments aligns directly with the kind of engineering work I find most meaningful.

Through hands-on project development, I have built AI-powered applications that combine OpenAI APIs with production-grade backend systems. In one project, I developed an AI-powered financial app using Express, TypeScript, and OpenAI, where I trained custom AI assistants on domain-specific datasets and integrated voice-to-text processing via AWS Transcribe. This experience gave me practical understanding of prompt engineering, API integration, and the importance of data privacy when deploying AI features.

On the software engineering side, I have professional experience managing the full software lifecycle from architecture and development to deployment and maintenance. I have worked with relational databases like MySQL and PostgreSQL, built real-time features using WebSocket and Socket.IO, and deployed applications on Linux servers using Docker, Nginx, and CI/CD pipelines. I am comfortable working with legacy codebases and making incremental improvements without disrupting live operations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am genuinely interested in contributing to your technical roadmap, particularly in the areas of AI integration and automation. I have attached my CV for your review and would welcome the opportunity to discuss how my background can support your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
