I am writing to apply for the Praktikum Talent & Influencer Management position at haebmau AG. Your focus on strategically developing creators and matching them with the right brand partnerships caught my attention. I am interested in contributing to your Digital Communications team while gaining hands-on experience in the influencer and talent management space.

Through my work as a software engineer, I have developed strong organizational and analytical skills that translate well into this role. Building full-stack applications required me to research requirements, identify the right tools and partners, track performance metrics, and present clear findings to stakeholders. These skills directly support the tasks of researching brand opportunities, preparing pitch materials, and analyzing talent performance data.

I am comfortable working with data and performance metrics, which would help me support the analysis of content performance and the development of new marketing approaches for your talents. My experience creating structured reports and presentations means I can contribute meaningfully to client meetings and partnership development from day one.

In addition to my technical background, I communicate clearly across teams and with external partners. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and I am actively learning German. I enjoy collaborating in international environments and adapt quickly to new workflows.

I am eager to bring my research skills, initiative, and structured thinking to haebmau AG. I have attached my CV for your review and would welcome the opportunity to discuss how I can support your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
