I am writing to apply for the Operations Trainee (m/w/d) position at Yoummday. Your 18-month program offers a direct path into operations management, and the opportunity to work across operations, training, talent, and sales is exactly the kind of hands-on, cross-functional experience I am looking for.

What stands out to me about Yoummday is the structured yet high-impact nature of the program. The idea of rotating through core business areas, taking ownership of real projects from day one, and building a 360-degree understanding of a scaling platform is something I find genuinely compelling.

In my professional experience as a Web Developer, I worked on operational aspects of product delivery. I analyzed KPIs related to application performance, identified deviations in system behavior, and implemented targeted improvements to optimize service performance and resource utilization. This required structured problem-solving, data-driven decision-making, and clear communication with stakeholders.

I am comfortable working in dynamic environments where priorities shift and initiative matters. I have consistently taken ownership of my work, managed projects with clear timelines, and maintained focus on measurable outcomes. I communicate clearly and precisely with team members and stakeholders, and I am committed to delivering high-quality results.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Yoummday’s growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
