I am writing to apply for the Marketing Allrounder position at EQUUSIR Germany GmbH. Your work in developing innovative health products for horses, dogs, and people caught my attention. I appreciate the focus on sustainability and the hands-on, collaborative approach your team values.

Through my work as a full-stack developer, I have developed a strong sense for design, layout, and visual consistency. I have used tools like Figma and Tailwind CSS to create clean, responsive interfaces, and I am comfortable preparing graphics, editing images, and structuring content for different formats. I enjoy working independently on creative tasks and taking responsibility for delivering polished results.

One area that particularly interests me is the use of AI tools for content creation. I have practical experience using ChatGPT and similar AI applications to support text generation, image processing, and workflow automation. I am genuinely curious about exploring new tools and finding practical ways to apply them in marketing contexts.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to bring my design sense, independent work ethic, and interest in AI tools to your marketing team. My CV is attached for your review.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
