I am writing to apply for the Industry Officer role at the Department of Justice and Community Safety, Victoria. The opportunity to help people build practical skills for life after prison through hands-on training in real workplace settings is meaningful work that I would be proud to contribute to.

My professional background is in software engineering, where I have developed strong discipline, attention to safety protocols, and the ability to work effectively within structured operational environments. I have experience monitoring production workflows, maintaining equipment, and meeting targets through systematic processes. These skills translate well to an industrial setting where safety, supervision, and continuous improvement are central.

I am a quick learner with proven resilience. In previous roles, I have adapted quickly to new tools, procedures, and team dynamics while maintaining focus on quality and efficiency. I understand the importance of following security and operational procedures, and I am comfortable working in environments where every day brings different challenges.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
