I am writing to apply for the Technischer Property Manager position at MY Humancapital GmbH. Although my professional background is in software engineering, I bring a strong foundation in technical problem-solving, structured project coordination, and independent work that aligns well with the responsibilities of this role.

In my previous work as a web developer, I managed end-to-end project delivery, coordinated with cross-functional teams, and maintained detailed documentation for system architecture, deployment workflows, and maintenance schedules. These experiences have equipped me with the discipline to track complex tasks, plan long-term measures, and ensure compliance with technical standards.

One area that particularly interests me is the opportunity to apply my analytical and organizational skills to the management of residential and commercial properties. I am comfortable overseeing technical processes, coordinating external service providers, and ensuring that all legal inspection obligations are met. My experience with Linux servers, Docker, and CI/CD pipelines has taught me the importance of structured maintenance planning and proactive issue resolution.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
