I am writing to apply for the Objektverwalter Facility Management (m/w/d) position with MY Humancapital GmbH. While my professional background is in software engineering and web development, I bring a strong technical foundation, system-level thinking, and experience managing complex operational workflows that are directly relevant to this role.

Through my work as a Web Developer, I have gained hands-on experience with Linux server administration, Docker containerization, Nginx configuration, and CI/CD pipeline management. I have been responsible for deploying, monitoring, and maintaining production systems, ensuring uptime, security, and compliance with operational standards. This technical operations experience has given me a practical understanding of managing infrastructure, coordinating resources, and maintaining system reliability.

One area that particularly interests me is the responsibility for technical operations, team coordination, and compliance that this role requires. In my previous positions, I regularly coordinated with cross-functional teams, planned resource allocation, and managed technical workflows to meet deadlines and quality standards. I am comfortable taking ownership of processes, ensuring regulatory compliance, and serving as a reliable point of contact for stakeholders.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
