I am writing to apply for the Registrar role at Queensland Government. The opportunity to contribute to the modernisation and improvement of the court system, with a focus on safety, innovation, efficiency, and enhanced access to justice, is one I find genuinely compelling.

As a software engineer with experience in system design and process automation, I understand how technology can transform complex workflows into more responsive and user-friendly experiences. My work has consistently focused on building systems that are reliable, scalable, and easy for people to use.

In previous professional roles, I have designed and developed full-stack applications using Laravel, Next.js, and Node.js, integrating RESTful APIs, authentication systems, and real-time features. I have also built monitoring dashboards that stream live system metrics, giving teams instant visibility into operational health. These experiences have given me a practical understanding of how to improve efficiency and reliability in service delivery.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
