I am writing to apply for the Handy Person position at CAN Group. The role involves conducting routine checks, responding to maintenance requests, performing basic repairs and DIY tasks, seasonal grass cutting, and ensuring work areas remain safe and operational. I am a practical, reliable individual who takes a methodical approach to every task.

Although my professional background is in software engineering, I have always been a hands-on person. I am confident carrying out basic repairs, minor fixes, and practical tasks around buildings. I understand the importance of keeping work areas tidy, safe, and fully operational at all times.

I am organised and proactive by nature. I do not wait for problems to escalate. I prefer to spot issues early, address them directly, and ensure everything is in good working order. Whether it is responding to a maintenance request or clearing paths of snow, I approach each job with the same level of care and attention to detail.

In addition to my practical skills, I work effectively across teams and communicate clearly with both technical and non-technical people. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am a quick learner and a reliable worker. I am ready to contribute to CAN Group’s facilities team and help maintain a safe, clean, and well-functioning environment. I have attached my CV for your review.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
