I am writing to apply for the Resource mobiliser position at Vrindavan Chandrodaya Mandir. The role's openness to candidates from engineering backgrounds aligns well with my experience in software development and project coordination.

Through my professional experience as a Web Developer, I have worked on full-stack applications using Laravel, Next.js, and React, building RESTful APIs, implementing authentication and role-based access control, and integrating third-party services. I have also deployed and maintained applications on Linux servers with Nginx, Apache, and Docker, using CI/CD pipelines for reliable delivery.

One area that particularly interests me is the opportunity to contribute beyond pure technical work. I have experience collaborating with stakeholders, managing development priorities, and communicating clearly across teams. I am comfortable adapting to different responsibilities and working toward shared goals in a structured environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to the team at Vrindavan Chandrodaya Mandir.

Sincerely,

Md Shahanur Islam Shagor
