I am writing to apply for the Junior Crypto Trader position at ATOM PARTNERS LIMITED. Your focus on digital asset markets, trading technologies, and data-driven research aligns with my interest in cryptocurrency and analytical problem-solving. I am eager to build practical trading knowledge in your structured environment.

Through my software engineering background, I have developed strong analytical and decision-making skills. I am comfortable working with data, identifying trends, and maintaining discipline in technical environments. These skills translate directly to monitoring markets, analyzing charts, and executing trades according to established strategies.

I am a quick learner who thrives in remote, international teams. I am fluent in English and experienced with tools that require focus and precision. I am ready to follow your comprehensive training program, use professional trading platforms, and continuously improve my market knowledge under mentorship.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I look forward to the opportunity to discuss how I can contribute to ATOM PARTNERS LIMITED as a Junior Crypto Trader.

Sincerely,

Md Shahanur Islam Shagor
