I am writing to apply for the Agency Core 1 position at Caterpillar Inc. Your company's focus on building stronger, more sustainable communities through innovation and problem-solving aligns with how I approach my own work.

Through my professional experience as a full-stack developer, I have spent over four years building and maintaining scalable web applications. My technical foundation includes Laravel, Next.js, React, Node.js, and TypeScript, along with MySQL, PostgreSQL, and REST API development. I focus on writing clean, maintainable code and delivering systems that work reliably in production.

In previous work, I have handled responsibilities that include implementing authentication and role-based access control, integrating payment gateways, optimizing database queries for performance, and deploying applications on Linux servers using Docker and Nginx. I have also built real-time features using WebSockets and managed CI/CD pipelines to streamline deployment workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to Caterpillar's operations team. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
