I am writing to express my interest in the Registrar role at the Department of Justice QLD. The opportunity to contribute to the modernisation and improvement of the court system, with an emphasis on safety, innovation, efficiency, and enhanced access to justice, aligns with my experience in building systems that improve reliability and user experience.

My background is in software engineering, where I have focused on designing and delivering scalable web applications and real-time monitoring systems. I have worked on projects that required careful attention to process optimisation, data integrity, and secure access. These skills translate well to a role that values innovation and efficiency in a complex operational environment.

In previous work, I developed a real-time server health monitoring dashboard that streams live system metrics to users, enabling proactive issue detection and improved uptime. I also built full-stack applications with role-based access control, secure authentication, and database optimisation. These projects required clear documentation, cross-team coordination, and a focus on delivering reliable, user-friendly systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
