I am writing to apply for the Junior Product Designer position at WealthCounsel, LLC. Your focus on building clear, well-crafted experiences for attorneys and your recognition as a 2025 Best Place to Work in the Cloud reflect a commitment to quality and collaboration that I find genuinely compelling.

Through hands-on project development, I have built a strong foundation in user-centered design and front-end technologies. I am proficient in Figma for wireframing, prototyping, and creating design documentation. My understanding of HTML and CSS allows me to collaborate effectively with engineers, ensuring designs are implemented accurately and efficiently. I am comfortable working within design systems and contributing to iterative improvements.

One area that particularly interests me is the emphasis on design thinking and problem framing. In my previous work, I have participated in discovery sessions, learned to distinguish user requests from underlying needs, and delivered designs that account for various states and viewport sizes. I am eager to apply this structured approach at WealthCounsel, working within the Discovery Trio to create intuitive and accessible software experiences.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV and portfolio for your review. I would welcome the opportunity to discuss how my skills and curiosity can contribute to the WealthCounsel product design team.

Sincerely,

Md Shahanur Islam Shagor
