I am writing to express my interest in the Care Coordinator role at SonderMind. Your mission to make therapy accessible for all resonates with me, and I am drawn to the opportunity to support clients at the very beginning of their care journey.

While my professional background is in software engineering, I have developed strong problem-solving abilities, attention to detail, and a proven capacity to learn and adapt to new technologies and processes quickly. I am comfortable working with complex systems and communicating clearly with both technical and non-technical stakeholders.

In my previous work, I collaborated closely with cross-functional teams, managed client-facing communications, and handled coordination tasks that required critical thinking and empathy. I am eager to apply these skills in a care coordination context, helping clients navigate their path to mental health support with patience and clarity.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to contribute to SonderMind’s mission and would welcome the opportunity to discuss how my skills and experiences align with this role. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
