I am writing to apply for the Grafikdesigner / Art Director position at WEISS GmbH. Your focus on visual brand management across both online and offline channels, combined with UI design for web applications, aligns with my experience in design and frontend development.

Through my professional experience as a Web Developer, I have worked on UI/UX design and implementation for corporate websites and web applications. I have used Figma for design prototyping and have translated those designs into responsive, accessible interfaces using Tailwind CSS, Bootstrap, and MaterialUI. I understand the importance of maintaining consistent visual branding across all communication channels, both online and offline.

One area that particularly interests me is the development of UI designs for web applications in coordination with developers. In previous projects, I have designed and built dashboards, travel platforms, and e-commerce interfaces where I was responsible for the visual language, layout structure, and overall user experience. I am comfortable working with cross-functional teams to ensure that design concepts are implemented accurately and efficiently.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my design and development experience can contribute to WEISS GmbH’s creative team.

Sincerely,

Md Shahanur Islam Shagor
