I am writing to apply for the Projektleiter/Projektingenieur fˆ…r HLS oder Elektro position at peil und partner ingenieure GmbH. Your firm's long-standing focus on energy-efficient and sustainable building technology, particularly your work on the decarbonization of the building sector, is impressive. I am interested in contributing to your team in Halle.

My background is in full-stack software engineering, where I have spent over four years designing, planning, and delivering complex technical systems. In this work, I have been responsible for the full project lifecycle from initial concept and technical planning through to implementation, testing, and final handover. This experience has given me a structured approach to managing technical projects, coordinating with diverse stakeholders, and maintaining clear oversight of timelines and deliverables.

A relevant example is my work on a multi-vendor e-commerce ecosystem, which required coordinating between customers, sellers, delivery agents, and logistics teams. I was responsible for planning the system architecture, defining technical requirements, and ensuring all components were delivered on schedule. This involved close communication with different user groups to align the technical solution with operational needs, similar to coordinating with clients, specialist planners, and project participants in building projects.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and technical planning skills can contribute to your team in Halle.

Sincerely,

Md Shahanur Islam Shagor
