I am writing to apply for the Projektleiter/Projektingenieur fˆ…r HLS oder Elektro position at peil und partner ingenieure GmbH, as advertised through Exzellente Jobs. Your company’s 30-year track record in energy-efficient building services and commitment to decarbonization is impressive, and I am interested in contributing to your project teams in Kiel.

My professional background is in software engineering, where I have spent over four years delivering technical projects from concept to completion. In my most recent role as a Web Developer at Explo-IT, I was responsible for planning, coordinating, and delivering full-stack applications while managing timelines, budgets, and stakeholder expectations. This experience has given me a structured approach to project management and a strong ability to track progress across multiple work streams.

One area that translates directly to this role is my experience with technical documentation and cross-functional coordination. I regularly created planning documents, technical specifications, and progress reports, and I coordinated with clients, designers, and other developers to ensure smooth project delivery. I am comfortable with MS Office and have a track record of quickly learning new tools and systems as project requirements evolve.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project coordination and technical planning skills could support your team in Kiel.

Sincerely,

Md Shahanur Islam Shagor
