I am writing to apply for the Customer Success Manager role at PlanD. Your focus on building the leading AI-ERP solution for the building cleaning industry in DACH is impressive, and I am interested in contributing to your next phase of scaling.

My background as a software engineer who has built and supported SaaS platforms gives me a practical understanding of what drives user adoption and retention. I have worked directly with users and stakeholders, onboarded them onto new systems, and translated their feedback into product improvements. This experience has taught me how to listen carefully, communicate clearly, and ensure customers see real value from the software they use.

What draws me to this role is the opportunity to shape customer success processes in an AI-first environment. I am genuinely curious about how automation and AI tools can improve the customer experience, and I enjoy working in small teams where good ideas can be implemented quickly. I am comfortable taking ownership, learning new industries, and contributing to scalable processes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the chance to discuss how I can contribute to PlanD’s growth.

Sincerely,

Md Shahanur Islam Shagor
