I am writing to apply for the Online Marketing Manager / Digital Marketing Consultant role at Klickkonzept by Cosmo5. Your approach to building data-driven, cross-channel marketing ecosystems for brands resonates with how I think about systems and strategy.

What stands out to me about Klickkonzept is the emphasis on T-Shaped marketers who combine deep strategic thinking with a broad understanding of how channels like SEA, Paid Social, SEO, Content, and CRO work together. As a software engineer who builds data-driven platforms, I am used to thinking across layers â from user experience and frontend performance to backend analytics and reporting. I see marketing strategy in a similar way: not as isolated tactics, but as an interconnected system designed to drive measurable outcomes.

Through my professional experience developing full-stack applications, I have worked extensively with data analysis, reporting, and optimization. I have built systems that track user behavior, monitor KPIs, and generate actionable insights. I am comfortable working with metrics like conversion rates, CPA, and ROAS, and I know how to translate raw data into clear recommendations for stakeholders. My technical background also means I can work effectively with AI tools and automation to streamline workflows and improve decision-making.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a role where I can grow my strategic skills while contributing to real business outcomes. I believe Klickkonzept offers that environment. I have attached my CV for your review and would welcome the chance to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
