I am writing to apply for the Amazon Advertising Manager / Retail Media Manager role at Klickkonzept by Cosmo5. Your approach to building T-shaped marketers who understand the full retail ecosystem rather than just campaign mechanics resonates with me. I am interested in contributing to a team that values strategic thinking and data-driven decision-making.

Through my work as a Full-Stack & AI Engineer, I have developed strong analytical skills and a data-oriented mindset. I regularly work with metrics, identify patterns in complex datasets, and translate those insights into clear recommendations. My experience building AI-powered applications has given me practical exposure to using generative AI tools to optimize workflows and iterate on solutions efficiently.

One area that particularly interests me is the cross-channel perspective your team emphasizes. In my previous projects, I have built systems that integrate multiple data sources and require understanding how different components interact. This has taught me to think holistically about performance rather than focusing on isolated metrics.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical approach and technical foundation could contribute to your team's success.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
