I am writing to apply for the SEO/GEO Manager / Organic Visibility Manager position at Klickkonzept by Cosmo5. Your approach to building a T-shaped marketing team that combines deep SEO expertise with cross-channel thinking and AI enablement is exactly the kind of environment where I can contribute meaningfully.

My background is in full-stack development and AI engineering, with hands-on experience building AI-powered applications that process data, generate insights, and improve user experiences. I have worked extensively with OpenAI and Replicate APIs to create intelligent assistants and image processing systems, which directly relates to the GEO and AI visibility work your team is pioneering. I understand how generative AI models surface information and how structured data, content quality, and technical foundations influence visibility in AI-driven search environments.

Through my professional experience as a Web Developer, I have built and optimized full-stack applications using Laravel, Next.js, and React, with a strong focus on performance, structured data implementation, and responsive design. I regularly analyzed application metrics, optimized database queries, and collaborated with content and development teams to ensure technical foundations supported business goals. This cross-functional approach mirrors the integrated SEO, content, and development workflow you described.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical background and curiosity about GEO can contribute to your team’s success.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
