I am writing to apply for the Senior Creative Strategist Social Media position at OneTwoSocial. Your focus on developing strategies and narratives that truly reach audiences in the DACH region stands out to me. I appreciate the emphasis on combining brand understanding, platform logic, and strategic creativity.

While my professional background is in software engineering, I have spent years building digital platforms that require a deep understanding of user behavior, content presentation, and platform mechanics. Developing responsive, SEO-friendly web applications has given me practical insight into how content is discovered, consumed, and shared across digital channels. This technical perspective allows me to approach social media strategy with a clear understanding of the systems that drive engagement.

One area that particularly interests me is the ability to translate trends and insights into compelling concepts and campaigns. In my work delivering full-stack applications, I have consistently analyzed user requirements, market context, and competitive landscapes to inform product decisions. I am comfortable moving from research and analysis to clear, actionable strategies that teams can execute.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
