I am writing to express my interest in the online teaching position at UANE. While my professional background is in software engineering and AI, I have consistently taken on mentoring and teaching responsibilities throughout my career. I find genuine satisfaction in helping others understand complex topics and develop practical skills.

In my previous roles as a Web Developer at Explo-IT and DataSoft LTD, I regularly conducted code reviews, guided junior developers through feature implementation, and led internal knowledge-sharing sessions on topics ranging from Laravel architecture to frontend optimization. These experiences taught me how to break down technical concepts into clear, digestible explanations that resonate with different learning styles.

One area that particularly interests me is the opportunity to teach in an online environment. Having worked remotely for several years, I understand the unique dynamics of digital classrooms and how to maintain engagement, clarity, and accountability without physical presence. I am comfortable using various collaboration and communication tools to support student learning effectively.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to discuss how my teaching approach and technical background could contribute to UANE’s academic programs. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
