I am writing to apply for the Software Engineer C++ (Windows) - Digital Microscopy position at EVIDENT Europe GmbH. The work your team does on the SLIDEVIEW VS200 system, combining precise hardware control with advanced image analysis for life-science research and medical diagnostics, is genuinely impressive. I am interested in contributing to a product that sits at the intersection of software engineering, hardware integration, and real-world scientific impact.

My technical foundation is built on C++ and modern software engineering practices. I have worked with C++ across multiple projects, including systems that require real-time performance, low-level hardware communication, and efficient data processing. I am comfortable with modern C++ standards and have used STL extensively in my development work. I also have practical experience with C# and understand the Windows desktop application ecosystem.

One area that particularly interests me is the challenge of building software that controls complex hardware while processing large volumes of image data. Through my work on the Wireless Vision-Aid for the Blind (WVAB) project, I developed a real-time assistive system using C++ and Python on embedded platforms like Raspberry Pi and ESP32-CAM. The system performed YOLOv8n-based object detection locally, streamed video over a custom UDP protocol for ultra-low latency, and provided audio feedback to users. This required careful hardware/software integration, image processing pipeline design, and performance tuning on resource-constrained devices.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills in C++ development, hardware integration, and software engineering can contribute to the continued success of the SLIDEVIEW VS200 system at EVIDENT Europe GmbH.

Sincerely,

Md Shahanur Islam Shagor
