I am writing to apply for the Werkstudent/in Internal Audit position at flatexDEGIRO SE. As a Software Engineering student with a strong foundation in analytical thinking and structured problem-solving, I am drawn to the opportunity to support internal audit processes at Europe's leading online brokerage platform.

Through my academic work and professional experience, I have developed a methodical approach to evaluating systems and processes. My background in software engineering has trained me to analyze complex workflows, identify potential risks or inefficiencies, and document findings clearly. These skills translate directly to supporting audit planning, reviewing internal controls, and assessing compliance with regulatory requirements.

In previous professional roles, I regularly worked with data analysis, process documentation, and cross-functional collaboration. I am comfortable preparing reports, organizing information, and communicating findings to different stakeholders. My experience with structured problem-solving and attention to detail would allow me to contribute effectively to audit preparation, testing, and reporting tasks.

I am currently pursuing a Bachelor of Science in Software Engineering, which has strengthened my ability to think analytically and work independently. I communicate clearly in English and Bengali, have working knowledge of Russian and Hindi, and enjoy collaborating in international teams. I value integrity and confidentiality, which I understand are essential in an internal audit environment.

I have attached my CV for your review. Thank you for considering my application, and I look forward to the possibility of contributing to the flatexDEGIRO team.

Sincerely,

Md Shahanur Islam Shagor
