I am writing to apply for the Senior Marketing Designer position at Onepage GmbH. Your mission to bridge the gap between Vibe Coding and no-code with AI-assisted page building is a genuinely interesting problem, and I appreciate the focus on keeping layouts fully controllable after generation.

My background combines design tool proficiency with hands-on front-end development. I have experience using Figma for UI design and prototyping, and I am comfortable translating visual concepts into responsive, functional interfaces using HTML, CSS, Tailwind, and React. This dual perspective allows me to understand both the creative and technical sides of landing page creation.

I have also worked with AI assistants in practical projects, integrating OpenAI and Replicate APIs into web applications to generate content and process images. I am comfortable using AI to draft concepts and visuals, and I see it as a tool to accelerate creative workflows rather than replace them.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Onepage’s marketing design efforts.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
