I am writing to apply for the Kaufmann/-frau fˆ…r IT-System-Management position at GastroSoft GmbH. Your company's focus on developing tailored POS software for gastronomy and retail businesses is impressive, and I am interested in contributing to your customer-facing IT support team.

Through my professional experience as a Web Developer, I have developed strong IT skills across Linux system administration, server configuration with Nginx and Apache, Docker containerization, and database management with MySQL and PostgreSQL. I am comfortable working with both software and hardware components, which directly aligns with the installation, configuration, and support responsibilities of this role.

One area that particularly interests me is the combination of technical support and customer consultation. In my previous roles, I regularly assisted users with software setup, diagnosed and resolved technical issues, and created clear system documentation. I am confident in my ability to handle first and second level support for your POS systems, guide customers in selecting appropriate hardware and software, and conduct user training sessions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to discuss how my IT knowledge and customer service orientation can support the GastroSoft team. My CV is attached for your review.

Sincerely,

Md Shahanur Islam Shagor
