I am writing to apply for the Teamassistenz Hˆ¶rakustik position at audibene GmbH in Munich. The opportunity to enter the hearing acoustics field and contribute directly to improving people's quality of life is something I find genuinely meaningful.

Although my professional background is in software engineering, I bring strong organizational skills, a structured approach to work, and proven experience in customer-facing environments. Through my work as a web developer, I regularly coordinated with clients, managed project timelines, and ensured smooth communication between technical and non-technical stakeholders. These skills translate well into administrative and coordination roles.

I am a quick learner who adapts easily to new domains. The structured training and qualification pathway offered by audibene aligns with my approach to professional growth. I am comfortable learning new processes, managing inventory and scheduling, and providing attentive support to customers.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the chance to discuss how I can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
