I am writing to apply for the Quereinstieg Hˆ¶rakustik position at audibene GmbH. The opportunity to enter a new field focused on improving people's quality of life through better hearing is genuinely appealing to me. I am ready to make a meaningful career change and bring my strong organizational and communication skills to your team.

While my professional background is in software engineering, I have developed transferable skills that align well with this role. In my previous positions, I acted as a communication hub, coordinating with clients, team members, and external partners to ensure smooth operations. I am comfortable managing schedules, handling administrative workflows, and maintaining organized systems. These experiences have prepared me to take on the customer-facing and administrative responsibilities described in this position.

I am particularly drawn to the structured training and qualification pathway that audibene offers. The opportunity to learn hearing acoustics through hands-on experience and formal education, including the Handwerkskammer certification, is exactly the kind of career development I am looking for. I am a quick learner and have consistently demonstrated the ability to master new technical domains throughout my career.

In addition to my professional experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to start this new chapter and contribute to your partner stores with dedication and a genuine desire to help customers hear better. I have attached my CV for your review and look forward to discussing how I can grow with audibene.

Sincerely,

Md Shahanur Islam Shagor
