I am writing to apply for the Buchhalter (m/w/d) position at ZYOX for the Autohaus Hallekamp in Rosendahl-Holtwick. While my professional background is in software engineering, I have developed strong analytical and organizational skills that are directly applicable to accounting and financial administration.

Through my work as a web developer, I have consistently managed complex data sets, tracked transactions, and maintained accurate records across multiple projects. My experience with database systems like MySQL and PostgreSQL has given me a structured approach to data integrity and monitoring, which aligns well with the responsibilities of accounts payable, accounts receivable, and asset accounting.

One area that particularly interests me is the opportunity to work with Dealer-Management-Systemen (DMS) and DATEV. My technical background means I can quickly adapt to new software platforms and leverage my understanding of system workflows to contribute efficiently from day one.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my structured work style, attention to detail, and ability to work independently make me a strong candidate for this role. I have attached my CV for your review and look forward to the possibility of discussing how I can contribute to the team at Autohaus Hallekamp.

Sincerely,

Md Shahanur Islam Shagor
