I am writing to apply for the Berater fˆ…r Informationssicherheit (w|m|d) position at DOMUS Consult Wirtschaftsberatungsgesellschaft mbH. Your focus on supporting clients in regulated industries with practical information security implementation aligns with my background in building secure, resilient systems.

My work in cybersecurity has involved designing privacy-preserving frameworks and secure communication protocols. Through research and development, I have worked with encryption methods (AES, secure key exchange), blockchain-based data integrity using SHA3-256 chaining, and Zero-Knowledge Proofs for anonymity. These projects required understanding threat models, implementing cryptographic protections, and building systems resilient against spoofing, jamming, and unauthorized access.

One area that particularly interests me is the practical application of security standards and organizational measures. In my project OmniGuard V2X, I developed a decentralized framework for secure Vehicle-to-Everything communication that addressed data integrity, privacy, and resilience against cyber and post-quantum threats. This involved risk analysis, security policy design, and implementing technical and organizational measures similar to what you describe for ISMS support.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am keen to bring my cybersecurity knowledge and engineering approach to your team. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to your clients' information security needs.

Sincerely,

Md Shahanur Islam Shagor
