I am writing to apply for the Projektleiter IT/Product Owner position at Der OnlineSteuerberater. Your focus on digital transformation in tax consulting and your vision of building a more efficient, user-friendly platform for clients is exactly the kind of challenge I want to be part of.

Over the past four years, I have worked across the full software development lifecycle, from initial concept and architecture to deployment and maintenance. My technical background spans Laravel, Next.js, React, Node.js, and modern JavaScript, and I have delivered production systems that handle authentication, payment integration, real-time features, and role-based access control. I am comfortable making technical decisions, coordinating with stakeholders, and ensuring that projects stay aligned with business goals.

One area that particularly interests me is the opportunity to drive change and improve internal workflows. At Explo-IT, I was responsible for delivering features end to end, working directly with stakeholders to translate requirements into working software. I also managed deployments on Linux servers using Docker, Nginx, and CI/CD pipelines, which gave me a solid understanding of the operational side of product delivery. I am used to balancing technical depth with clear communication across teams.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
