I am writing to apply for the Docente a Tiempo Parcial position at Universidad Catˆ‡lica Santo Toribio de Mogrovejo for the Escuela de Comunicaciˆ‡n. The opportunity to guide students through their research projects in a virtual environment aligns with my academic and professional background.

Through my research and development work at Voronezh State University, I have built a strong foundation in project methodology and structured investigation. My research focuses on secure UAV systems, decentralized coordination, and cybersecurity protocols, which has required me to design experiments, collect and analyze data, and document findings systematically. These skills directly support the supervision of student research projects.

In addition to my academic work, I have over four years of professional experience as a full-stack developer. I have built and deployed web applications using Laravel, Next.js, React, and Node.js, and have worked extensively with databases, REST APIs, and cloud infrastructure on AWS and Linux servers. This hands-on technical experience allows me to teach students how to integrate ICT tools effectively into their research workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background can contribute to the academic mission of USAT.

Sincerely,

Md Shahanur Islam Shagor
