I am writing to express my interest in the Engineer 2 position at Catalyst Brands India. With a background in full-stack development and a focus on building scalable, secure, and maintainable systems, I am confident I can contribute effectively to your engineering team.

My professional experience spans four years of full-stack web development, where I have worked extensively with Laravel, Next.js, React, TypeScript, and MySQL. I have built and integrated RESTful APIs, implemented authentication and role-based access control, and optimized database performance through query tuning and caching strategies. These skills align well with the responsibilities of this role.

In previous work at Explo-IT, I delivered real-time features using WebSockets, integrated third-party services such as payment gateways and cloud storage, and deployed applications on Linux servers with Nginx and Docker. I also contributed to frontend development with responsive, SEO-friendly interfaces using Tailwind CSS and modern JavaScript frameworks.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background and skills can support the work at Catalyst Brands India.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
