I am writing to express my interest in the Multi Skilled Operative position at Tarmac. While my professional background is in software engineering, I bring a strong foundation in problem-solving, adaptability, and a commitment to learning new skills quickly. I am drawn to Tarmac's reputation as an industry leader and its focus on building a supportive, inclusive culture where people can grow.

In my previous roles as a web developer, I worked across multiple domains, from backend API development to frontend UI implementation and server deployment. This required me to learn new tools and workflows rapidly, collaborate with cross-functional teams, and take ownership of tasks from start to finish. I approach every new challenge with the same discipline: understand the requirements, ask the right questions, and deliver reliable results.

One area that particularly interests me about this role is the emphasis on training and development. I am someone who thrives when given the opportunity to build new skills. Whether it was transitioning from Python to Laravel or learning deployment workflows with Docker and Nginx, I have consistently invested time in mastering unfamiliar tools and processes. I am confident I can bring that same learning mindset to the operational environment at Tarmac.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application. I would welcome the opportunity to discuss how my skills and work ethic can contribute to Tarmac's team.

Sincerely,

Md Shahanur Islam Shagor
