I am writing to apply for the Learning & Development Specialist position at Nestlˆ' Health Science. Your mission to merge nutrition, science, and wellness through innovative products and people development is compelling, and I am interested in contributing to the learning initiatives that support your Holistic Health team.

My professional background is in software engineering, with a strong emphasis on integrating AI-powered tools into practical applications. I have worked extensively with technologies such as OpenAI, Replicate API, and various machine learning models to build intelligent features that automate workflows and enhance user engagement. This experience directly supports your requirement for fluency in AI and digital tools to design innovative training solutions and streamline content development.

In previous roles, I have developed full-stack applications that required managing complex data flows, implementing role-based access control, and integrating third-party services. I am comfortable working with digital collaboration platforms and data management systems, which aligns with your need for someone who can utilize tools like Microsoft SharePoint and Microsoft Forms to manage learning resources and track metrics. My ability to analyze system performance and generate reports will support the compliance tracking and learning analytics responsibilities of this role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my skills can support the learning and development goals at Nestlˆ' Health Science.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
