I am writing to apply for the Heading role at bankari.sk. With a strong background in full-stack development and a focus on building reliable, scalable systems, I am confident I can contribute effectively to your team.

Over the past four years, I have worked extensively with Laravel, Next.js, React, and Node.js, delivering production-grade web applications that prioritize performance, security, and user experience. My work includes building RESTful APIs, implementing authentication and role-based access control, integrating payment gateways, and optimizing database queries for speed and reliability.

In my professional experience at Explo-IT, I designed and developed scalable web applications using Laravel on the backend and Next.js on the frontend. I built real-time features using WebSockets, deployed applications on Linux servers with Docker and Nginx, and maintained CI/CD pipelines. I also developed a multi-vendor e-commerce ecosystem that coordinated customers, sellers, and delivery agents through a Laravel backend and Flutter mobile apps.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background aligns with the needs of bankari.sk.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
