I am writing to apply for the Orientador a Laboral Freelance Remoto position at Ironhack. The opportunity to guide students through their career preparation and help them successfully enter the job market is something I find genuinely meaningful.

Although my professional background is in software engineering, I have spent a significant amount of time mentoring and supporting junior developers and bootcamp students. I have guided them through technical challenges, reviewed their project work, and helped them build the confidence needed to pursue new career opportunities. This experience has given me a strong understanding of how to support learners in achieving their professional goals.

In previous roles, I worked closely with team members to help them develop both technical and soft skills. I provided regular feedback, tracked progress, and adjusted my approach based on individual needs. I am comfortable working in both live and asynchronous settings, and I understand the importance of creating a supportive environment where students feel encouraged to grow.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how my mentoring experience can support Ironhack’s students during this bootcamp program.

Sincerely,

Md Shahanur Islam Shagor
