I am writing to apply for the Influencer Marketing Coordinator position at Newhouse. Your agency's work across entertainment, automotive, finance, and DTC verticals is impressive, and I am drawn to the opportunity to coordinate creator campaigns for well-known brands.

Although my professional background is in software engineering, I have developed strong organizational and communication skills through managing complex, multi-stakeholder projects. In my previous roles, I coordinated between developers, designers, and business teams to deliver products on time and within scope. This experience has taught me to communicate clearly, track details carefully, and adapt quickly to changing priorities.

I am particularly interested in the campaign development and creator discovery aspects of this role. I enjoy researching trends, analyzing data to identify the right partners, and crafting clear briefs that align with strategic goals. My analytical mindset helps me evaluate performance metrics and optimize workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills in coordination, communication, and analysis can contribute to Newhouse's influencer marketing efforts.

Sincerely,

Md Shahanur Islam Shagor
