I am writing to apply for the Senior Operations Specialist, New Verticals & Drive Operations role at Wolt. The opportunity to shape the future of delivery operations for a company that is expanding from restaurant food to almost everything is exactly the kind of challenge I am looking for.

My professional experience has been rooted in owning projects from idea to measurable impact. As a Web Developer, I regularly took initiatives from hypothesis to scale: identifying opportunities, designing solutions, running tests, and rolling out changes across multiple environments. I am comfortable with data analysis, building dashboards, and using insights to drive decisions.

One area where I see a direct connection is in optimizing operational workflows. In my development work, I have built systems that track real-time metrics, monitor performance, and surface actionable recommendations. I approach problems by separating assumptions from facts, testing hypotheses, and iterating until the solution is clear and effective.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how my analytical mindset and project ownership experience can contribute to Wolt’s New Verticals and Drive Operations team.

Sincerely,

Md Shahanur Islam Shagor
