I am writing to apply for the Founder's Associate (Working Student) position at Nulegal GmbH. What stands out to me about Nulegal is the clear focus on building an AI-first LegalTech company where people concentrate on thinking and decision-making while AI handles execution. That philosophy aligns with how I approach my own work.

As a software engineering student with hands-on experience across full-stack development, AI integration, and system automation, I am used to taking ownership of projects from start to finish. I have built AI-powered applications using OpenAI and Replicate APIs, developed real-time monitoring dashboards with Socket.IO, and deployed production systems on AWS and Docker. I experiment proactively with new tools and find practical ways to apply them.

In my professional experience as a Web Developer, I have worked directly with stakeholders on special projects, coordinated cross-functional requirements, and delivered features end to end. I have supported growth efforts by building customer-facing platforms and internal dashboards. I am comfortable managing operational tasks, tracking financial flows, and keeping initiatives on track without needing constant supervision.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to Nulegal's growth and operations.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
