I am writing to apply for the (Senior) Software Developer Fullstack position at TEQYARD. Your focus on building custom software solutions, from intelligent chatbots to powerful platforms, for industrial clients in their digital transformation is exactly the kind of environment where I want to contribute my full-stack development experience.

With over four years of professional experience in full-stack development, I have built and delivered production applications using JavaScript, TypeScript, React, Next.js, Laravel, and Node.js. I have worked extensively with SQL, PostgreSQL, and MongoDB, and I am comfortable making technology decisions around system architecture, server-side logic, and database interactions.

In my professional experience at Explo-IT, I designed and developed scalable web applications using Laravel for the backend and Next.js for the frontend. I built RESTful APIs, implemented authentication and role-based access control, and integrated secure payment gateways. I also created responsive, SEO-friendly user interfaces and delivered real-time features using WebSockets. I deployed and maintained applications on Linux servers with Nginx and Docker, and set up CI/CD pipelines.

One project that reflects this skillset is the Multivendor E-commerce Management Ecosystem, where I built a full-stack marketplace platform using Laravel and MySQL for the backend, with role-based access control for customers, sellers, and delivery agents. I also developed multiple Flutter-based mobile apps and integrated Firebase notifications and Google Maps API.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can support TEQYARD’s client projects.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
