I am writing to apply for the Mitarbeiter (m/w/d) Kundenbetreuung & Datenerfassung position at Dein Finanzmanangment. Your focus on helping individuals track expenses and identify savings opportunities aligns with my own preference for structured, detail-oriented work.

Through my professional experience as a Web Developer, I have developed strong organizational habits and a reliable approach to managing data. I have worked with databases like MySQL and PostgreSQL, ensuring accurate data entry, maintenance, and retrieval. This experience has given me a solid foundation in handling client information carefully and systematically.

One area that particularly interests me is client support. In my previous roles, I assisted with administrative tasks, prepared documentation, and communicated with stakeholders to ensure smooth workflows. I am comfortable using digital tools and can quickly learn new software, which makes me well-suited for tasks like data entry, appointment preparation, and supporting marketing efforts.

In addition to my technical experience, I work effectively across teams and communicate clearly with both technical and non-technical people. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international environments. I am also a quick learner and take a structured, reliable approach to every task.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills and work style can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
