I am writing to apply for the Kundenbetreuer Immobilienverwaltung position at MY Humancapital GmbH. While my professional background is in software engineering, I bring strong communication skills, service orientation, and experience managing client interactions through digital channels.

In my previous role as a Web Developer at Explo-IT, I worked directly with stakeholders to understand requirements, document processes, and deliver solutions that met client expectations. This experience taught me how to handle inquiries clearly, follow defined workflows, and maintain high service quality throughout the delivery cycle.

One area that particularly interests me is the opportunity to work with CRM systems and digital service platforms. I have hands-on experience with various software tools and databases, and I am confident in my ability to quickly learn new systems and adapt to your existing processes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to bring my service-oriented mindset, strong organizational skills, and willingness to learn to your team. I have attached my CV for your review and look forward to discussing how I can contribute to your partner company in Munich.

Sincerely,

Md Shahanur Islam Shagor
