I am writing to apply for the Technician 3 position at Sunbelt Rentals, Inc. Your company's reputation as the fastest growing rental business in North America and commitment to investing in workforce development is impressive. I am interested in contributing to a team that values safety, service, and continuous skill-building.

My professional background is in software engineering, where I have developed strong diagnostic and troubleshooting skills that are directly applicable to equipment repair and maintenance. I am accustomed to working with complex systems, identifying root causes of failures, and implementing effective solutions to minimize downtime. This systematic approach to problem-solving translates well to diagnosing hydraulic, electrical, and mechanical issues in equipment.

Through hands-on project development, I have built and maintained real-time monitoring systems that track system health, availability, and performance metrics. This experience has given me a practical understanding of preventive maintenance, performance optimization, and the importance of proactive issue detection before failures occur.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am prepared to bring my strong work ethic, quick learning ability, and systematic troubleshooting skills to the Technician 3 role at Sunbelt Rentals. I have attached my CV for your review and look forward to the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
