I am writing to apply for the Product Manager Solar Inverters position at TMEIC Corporation Americas. Your focus on developing and executing solar inverter product strategies over rolling time frames aligns with my experience in managing technical product lifecycles and delivering solutions from concept to launch.

Through my professional experience as a Web Developer, I have worked closely with business stakeholders to assess requirements, prioritize features, and translate product ideas into actionable development plans. I have developed thorough documentation, including product requirement documents and technical specifications, and have maintained sales and marketing collateral to support business growth.

One area that particularly interests me is the role's emphasis on cross-functional collaboration and market assessment. In my previous roles, I have built and sustained productive relationships with internal teams and external partners, ensuring timely resolution of issues and alignment on product development schedules. I am comfortable providing technical consulting and training to sales teams and continuously improving processes based on feedback and data.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my product management and technical background can contribute to TMEIC's solar inverter product line. Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
