I am writing to apply for the Content Writer / Editorial position at Unigo. The focus on careers and AI's impact on the workforce is a topic I find genuinely relevant, and I appreciate the opportunity to contribute to content that helps readers navigate these changes.

Through my professional experience as a Web Developer, I have built and maintained content-driven platforms where structure, clarity, and user experience are critical. One project that directly relates to this role is the Newsroom Management dashboard, a full-stack application I developed using Next.js and Material UI. This system was designed to streamline editorial workflows, allowing writers and editors to manage articles, revisions, and publishing schedules efficiently. Working on this project gave me a practical understanding of how content is created, reviewed, and delivered in a professional publishing environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
