I am writing to apply for the VP Paid Media role at Kanahoma. I understand this position requires a leader who can define paid media strategy, drive AI integration, and build high-performing teams. While my career has been in software engineering and AI, I bring a technical and systems-oriented approach that aligns with the forward-looking, AI-enabled vision Kanahoma is pursuing.

My work has consistently involved building scalable platforms and integrating AI into production systems. I have developed AI-powered applications using OpenAI and Replicate APIs, built real-time data pipelines with WebSockets and SSE, and deployed infrastructure on AWS with Docker and CI/CD pipelines. This technical foundation gives me a practical understanding of how AI tools can be evaluated, piloted, and operationalized to improve workflow efficiency and campaign performance.

One area that particularly interests me is the role of AI in transforming paid media operations. I have experience leading AI pilots, training custom assistants, and implementing automated reporting systems. In my project work, I built a real-time server health monitoring dashboard that streams live metrics using Socket.IO, and an AI-powered financial app that automates document generation and voice-to-text processing. These projects required cross-functional coordination, clear documentation, and measurable outcomes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
