I am writing to apply for the Asst Depot Manager position at Unilever. While my professional background is in software engineering, I bring strong analytical, coordination, and problem-solving skills that are directly relevant to managing efficient depot operations.

In my work as a web developer, I have consistently taken ownership of end-to-end delivery, coordinated with cross-functional teams, and tracked performance metrics to drive improvements. I am experienced in monitoring KPIs, managing resources, and ensuring compliance with quality standards. These skills translate well into supporting day-to-day warehouse operations, inventory accuracy, and continuous improvement initiatives.

One area that particularly interests me is the opportunity to support the deployment of digital tools and CI projects in the depot. I have hands-on experience integrating digital solutions into operational workflows, which could help streamline processes and improve efficiency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
